

September 7, 2019 - *Pyramids* with Pam Hadfield

This fun pieced pattern is great for playing with color values. Opposite triangles of lights and darks gives multiple dimensional triangular images.

Pam has been sewing since she was 10 years old. Starting with traditional piecing, she branched out into traditional appliqué, then appliquéing with wool and enhancing it with embroidery stitches. She loves exploring art with pictorial quilts. Currently a teacher at Saddleback Community College's Community Education program, she has designed her first two quilt patterns. (mamapquilts.com)
